ANKARA WATER SUPPLY AND SEWERAGE

Location

City of Ankara

Client

Ankara Water and Sewerage Administration (ASKI), Ankara

Financing

German Financial Cooperation / KfW

Period

1991 - 2001

Value of own Services

0.300 million US\$

**Project Description**

Implementation of a large drinking water distribution system and construction of a central sewage treatment plant.

Scope of Services

Technical assistance to ASKI:

- Development of a data bank for industrial effluent control and carrying out of quality simulation for the Sakarya river
- Setting-up of an advanced graphical and numerical Network Information Center (NIC) for the water distribution system
- Collection of basic data for the NIC by digitizing and feeding field survey data into the data bank
- Critical appraisal and final acceptance of the existing final design and tender documents for the central treatment plant
- Preparation of a conceptional design for the pretreatment of industrial effluent on the basis of a verified sewage register
- Supervision of start-up of the new treatment plant and issuing of relevant final acceptance certificates

(Joint Venture)
